MOTIVATION LETTER

Sitko Patryk
yourehired@sitkopatryk.be

Brussels, 18 september 2019
Updated: Halle, 28 july 2021

Subject: vacancy, Junior React developer

Dear,

I would like to apply for this **exciting** and challenging position and in this short will I explain my **motivation**.

I have completed the Front-end **Developer training** at Intec Brussels. During this training I knew that a position as a front-end developer was a perfect fit for me. For the time being, I am actively developing my own **project** and enjoying working on it every single day (www.sitkopatryk.be, (old: www.wakeywakey.me)). In order to further **develop myself** and to be able to realize more assignments, am I looking for a workplace where I can further develop my skills and **your company** seems to be the **right place**.

As a front-end developer **I'm responsible** for the **design and implementation** of end-user interfaces within web applications that offer a **proper experience**. In this way can I make the right proposals for the realization of **functionality** that meets the wishes, demands and **needs** of the **end users**.

I have extensive **knowledge and experience** with **Yarn, JavaScript/ECMAScript, Reactjs, HTML, CSS, Redux, React routing, XML, Json, Git** and some additional libraries for front-end development of **single page applications**.

I am a **social person** with a great **sense of responsibility**. I'm someone that **stands firmly** in my shoes. I know that I'm excellently **capable** of handling myself in stressful situations. I would like to **work together** in a **team** where I can **learn** from colleagues and them from me. Working lonely isn't an issue neither.

Hopefully have you a great idea of my capabilities after reading this letter. I would like to **express** my **motivation and enthusiasm** in an introductory meeting.

Kind regards

Sitko Patryk
